

To Whom It May Concern

Dear Sir/Madam,

Subject: **Recommendation for Nan Ohnmar Wai**

I am the founder of Let's Share, a local youth-based organization in Myanmar.

I have known **Nan Ohnmar Wai** when she joined our team as a content writer. She has been the most dedicated in our team and a very active member since her first work. What drew my attention to her was her active participation in social skill improvement projects and academic work. Later, she was promoted to become the marketing manager of the research and marketing department.

By doing content planning, virtual programs, and other operational activities at Let's Share, **Nan Ohnmar Wai** and her team displayed their organizing ability and soft skills. The activities have proven that she is willing to work hard and can take full responsibility for her work. As a founder, I have every confidence in her leadership skills and potential continental contributions to the country.

With the combined strength of contributors like her, Let's Share Projects have reached over 3000 people with a social media presence of over 120K people.

This letter is to inform you about the important works done by **Nan Ohnmar Wai** for the betterment of the skill improvement projects organized by Let's Share from 9th August 2020 to 31st January 2021. Since she is dependable, efficient, and professional at her work, I have no doubt at all she would be able to overcome any kind of challenges as required.

If you have any questions, please do not hesitate to contact me at maytwetarkyaw@gmail.com

Sincerely,
May Twetar Kyaw
Founder, Let's Share

[Let's Share](#) is a youth-based organization and as the name itself says "Let's Share", we believe sharing is caring which means a way of showing love and we would like to support our society with as much knowledge and information as we can. Our goal is to become a better and more innovative youth organization where youths can discuss the topics we deliver through posts and programmes so that they can contribute back to their environment. We aim to share knowledge and help our visitors get easier access to unlimited resources through our page for various kinds of topics. We mainly share articles related to technology, education, science, and tips for life as well as provide events for youths to encourage fun-learning.
